

Group work peer assessment

Name: Kailey Stark

Lab time

Activity done as a group: Pilot Project

Write the names of the members of your group, including your own, at the top of a column in the table below. Then, place a number in the boxes under each category indicating the degree of effort you feel each group member made, on a scale of 1–5, with 5 being highest, and 1 being lowest. If you think the category is not applicable to this particular group activity, write N/A (not applicable) in that box.

If you gave a low score to someone in a particular category, provide a brief explanation of your reasoning in the comments section below the table. Likewise, if you feel that someone did an exceptional job, elaborate on the details in the comment section.

Meetings are considered to have occurred during lab and class times, virtually as well as any set up outside of class.
